

UbiHOMESERVER – Ubiquitous Home Environment Infrastructure Ready for Ambient Assisted Living Scenarios

Interoperability:

- Organisational
- Conceptual
- Dynamic
- Pragmatic
- Semantic
- Syntactic
- Technical

Intelligent Behaviour:

Algorithms → Semantic Reality

Multimodal GUIs, the same look and feel:

- ✓ TV
- ✓ Mobile phone
- ✓ Touch-screen

- Device recognition
- Content adaptation
- Simplicity and intuitiveness

The research is supported by Tekes – the Finnish Funding Agency for Technology and Innovation, European Regional Development Fund and Real Estate Property company Kiinteistö Oy Kummatti, and Telephone Operator Pohjanmaan Puhelin Oy.
